Spanish Citizenship Service – Structured Knowledge Base for RAG

Main takeaway: The dataset below distils Jobbatical's service offer, the legal frameworks governing Spanish citizenship, and practical application details into, source-linked passages ready for embedding into a vector store.

1. Dataset structure

```
[

    "passage": "Step-by-step support: (1) Eligibility confirmation via residency history
  }
]
```

Import this JSON directly into your vector-store loader; each `"passage"` is a standalone chunk optimised (< 900 characters) for embedding.

2. Comparative residency timeline (quick reference)

Applicant category	Minimum continuous legal residence before applying	Dual-citizenship allowed?
General foreigners	10 years [1]	Rare (must renounce)
Refugees	5 years [1]	Case-by-case
Latin-American, Andorran, Portuguese, Philippine, Equatorial-Guinean, Sephardic origin	2 years [1] [2]	Yes (no renunciation) [2]
Married to a Spaniard, born in Spain, widower, under guardianship, etc.	1 year [1]	Depends on origin

3. Implementation notes

1. **Chunk size:** Keep passages < 1 KB to stay within common embedding limits.
2. **Metadata:** Store `source` URLs to enable reference links in RAG answers.
3. **Updates:** Re-crawl Jobbatical's landing page periodically; service fees or metrics may change.
4. **Sensitive legal advice:** Add a guard-rail in your chatbot prompting users to consult a qualified immigration lawyer for case-specific counsel.

This structured corpus provides authoritative, citation-linked knowledge that can be vectorised and queried by your LLM-powered Jobbatical chatbot.
